

BORN TO INNOVATE

BLK Aluminium systems - A full range for every need

Opening series

CLASSIC 136 Simple and smart, designed to be easy to use, offering a warm sensation of comfort and elegance. Perfect for interior partitions.

CLASSIC 142 Light and elegant, presents a modern, minimal design. Innovative architectural characteristics and user-friendly technical specifications make BLK142 recommended for medium opening spans, shop windows and internal doors. Ideal solution for budget long-lasting problem-free performance.

REGAL 154 Developed to meet all the constructors needs. The result is an intelligent system without any compromise in quality or performance. It is ideal for any construction with opening windows or doors, from luxury shops showcases, doors and windows in residents that stand out of the ordinary (tilt and turn, pivot windows, bended windows, tilt and slide etc), to complex interior partitions.

Opening thermo series

CLASSIC 254 thermo An enhanced three-chambers thermal-break system using the "Ω" shape polyamide insulation of 18mm with fiberglass reinforcement. CLASSIC 254 THERMO combines design with cost energy saving. With thermo coefficient $U_f = 2.91 \text{ W/m}^2\text{K}$, it meets all the modern thermo insulation needs and sets the standards in the category for thermal and acoustic performance.

REGAL 262 thermo With coefficient $U_f = 2.30 \text{ W/m}^2\text{K}$ offers top thermo insulation and maximum cost energy saving. It's a highly sophisticated three-chamber thermo system using the "Ω" shape polyamide insulation of 26mm with fiberglass reinforcement. It combines top-class thermo performance with extra high robustness and modern style. REGAL 262 thermo is ideal for external doors and windows of any size, where maximum thermo insulation, robustness and safety are the priorities.

Sliding series

CLASSIC 330 Simple and elegant. The small-sized modern architecture line creates a pleasant atmosphere in internal rooms. Classic 330 is a flexible system suitable for medium sliding windows and internal partitions offering elegance and comfort to residents, business or industrial places.

REGAL 337 Regal 337 is a new generation sliding system with minimal design, meeting all the aesthetic values of modern architecture for wide transparent openings. Intergrading innovative design and functional characteristics, Regal 337 offers the best combination of elegance, functionality and robustness. It's a true unique, timeless value. Windows and doors slide on an additional inox or anodized aluminum driver for smooth and quiet movement and the feature of it's style.

Sliding thermo series

REGAL 443 thermo An enhanced sliding three-chambers thermal-break system using the "Ω" shape polyamide insulation of 12mm with fiberglass reinforcement. Regal 443 includes specially designed profiles to ensure that all the accessories of the system are fitted without harming the thermo break. In this way top thermal and acoustic insulation are achieved. Regal 443 is ideal for extra wide spans, thanks to the robust sashes and the tube type frames it presents.

"Perfection is not when there is nothing to add, but when there is nothing to take away" - Saint Exupery

WHY BLK aluminium?

Because BLK are the new generation systems, which combine in a unique way all the important characteristics of the modern aluminum systems.

Simple. Elegant. Stylish
Their lines are simple and clean. Free of the unnecessary elements. It is the classiest and more modern trend in architecture – "less is more" Mies van der Rohe – and in the high-tech product design. It offers a restful, delicate and elegant style in every room of the resident or the office and is harmonically combined with every architectural style classic, modern or avant-garde. **BLK Aluminium** style is timeless.

Multiple solutions
Opening and sliding systems for doors and windows of every type. **BLK Aluminium** systems are ideal for ordinary or special windows and doors like tilt and turn, bended or tilt and slide, etc. Alternative solutions for frames and sashes. A great selection of end-finishing profiles assures the fine result. Absolute freedom in the color selection with more than 400 high quality colors with special seaside painting manufacture for the protection of the windows and doors from the sea salt.

Efficient thermic insulation
Thermo BLK Aluminium systems are developed and produced according to the latest thermo and acoustic insulation technology. They use three-chamber design with "Ω" shape polyamide insulation with fiberglass reinforcement. They offer top class thermo insulation coefficient reaching the maximum thermo insulation. They are consistent with the highest possible cost energy saving standards offering a highly relaxing residential or business place.

Upgraded engineering
New, innovative design to achieve absolute water and airflow insulation. Enhanced dimensions and robust constructions, according to the specifications of every system, allows **BLK Aluminium** to withstand heavy use and last a life time.

Easy to install, easy to maintain
Big sashes and chambers, great variety of profiles and fully compatible accessories make the construction of **BLK Aluminium** an easy business. Special care was given to ensure functional simplicity and easy maintenance.

Safety
All **BLK Aluminium** systems are designed to be compatible with multi-locking systems. In this way top safety standard are guaranteed.
